

How the Binaural Beat Audio Options with FlameInMind.com came to be the most powerful / bioactive / bliss-inducing sounds available

- Our BlissTuner-earlier work showed how golden ratio EEG produced Bliss/Peak Perception
- Dan Winter then showed how those frequencies in general -when TUNED TO PLANCK- produced centripetal force/ negentropy/ self-organization www.fractalfield.com
- We split that accurately for mirror 180 degree (conjugate) hemisphere mirroring perfecting the phase shift between hemispheres - using Dan's new phase conjugation principles.
- We set this up to be a perfect binaural resonance interferometry mirror- in exactly the same phonon pattern used in the powerfully successful Theraphi.net - plasma rejuvenation system. In fact we expect these binaurals to be profoundly synergetic with Theraphi.
- Patrick Botte- with pioneering Sacral-Cranial expertise polished this powerful implosion sound BinAural- adding precise options for long wave cross hemisphere beat heterodynes tuned to
 - 0.1hz- MAYER wave -THE most important- spine/blood/hrv-LF resonance
 - or
 - key Ventrical pump/drain frequencies like .06 hz- directly related to Kundalini physics -and the key Sacro-Cranial 'long tidsals' ... 'ride the long wave'!

To play Binaural sounds

Touch the
lower right button

Binaural Sounds can be played
with OR without Waves Analyser

3 main parts in the App:

- Binaural Sound Generator
- Waves Analyser
- Connection with HRV Sensors

WARNING

Some sounds are generated
with high audio frequencies

A warning is displayed concerning these sounds.
Avoid these sound waves
if you are very sensitive to high frequency sounds,
or if you have any tinnitus problems.

These generated sound are very powerful.
They are linked to original frequencies of the universe.

In the world we are living, most of the times,
we are out of tune with these frequencies.

Reminder- this uniquely 'conjugate' / implosive or fractal harmonic series by equation is the theoretical maximum of possible self-organizing even blissful biologic frequencies. AND in fact many if not most of those who have tried this 'Theraphi' frequency series in binaural do indeed report some kind of bliss experience or at least notable 'still point' impression.

That being said- we remind that as with all psychoacoustics you should proceed with caution- and find your own 'sweet spot' in sound.

At the beginning (also related to your stress), some of these sounds can be very disturbing.
Recovering the connection to these frequencies should be done
very carefully & step by step.

Always avoid playing sounds you do not feel comfortable with.

To begin, start with THERAPHI frequency first preset:
THERAPHI 50 => 1000 Hz

Allow your body to become accustomed to enter in resonance with these frequencies.

After a few sessions, when you feel much comfortable with the generated sounds,
you can select the next preset with more high frequencies
or begin playing CHAKRAS sounds.

It can happen that sometimes (related to your stress),
you do not feel anymore comfortable with some sounds.

In this case, always go back to THERAPHI frequency first preset: **THERAPHI 50 => 1000 Hz**

8 main buttons

to select and modify preset sound waves

big comment button:
only available
for THERAPHI frequencies

Can be used to display the selected
frequencies related to the presets

- Touch once to display the freq table.
- Touching a second time allows to change parameters.

Preset sound wave

2 kinds of Bineural sounds :

THERAPHI sounds

Presets are sound waves generated according to the THERAPHI frequencies.

For each preset sound, you can change the bineural BEAT frequency and the SHIFT between L/R hemispheres.

The big Comment button can be used to display the selected frequencies related to the presets

- Touch once to display the freq table.
- Touching a second time allows to change parameters.

1 CHAKRA

sounds

+ CHAKRAS

Presets are sound waves generated in relationship (resonance) to the chakras frequencies.

See on the picture the parts of the body related to the generated frequencies.

For chakras sounds, it is only possible to change Shift & bineural beat frequency.

Theraphi sounds & meditation

Theraphi sounds

can help to jump much faster and more deeply in low frequencies meditating states

Presets are sound waves generated according to the THERAPHI frequencies.

For the firsts meditating sessions, please use the first preset ***THERAPHI 50 to 1000 Hz.***

This first preset will help you to ground.

Once you will be more familiar with theses sounds, you can step by step select next presets

Some presets are generated with high audio frequencies
Avoid these sounds if you are very sensitive to high frequency sounds,
or if you have any tinnitus problems.

Theraphi sounds table

Touch one more time the Comments button to unlock the frequency table.

A text allowing to modify the presets is displayed at the bottom of the table

Playing with the presets can help you for a better understanding of how the sound waves are created and generated.

The original presets were dedicated to get the best results in bineural sound waves.

Changing these parameters can affect the efficiency of the generated sound waves.

For better results, we recommend not to change the presets for a too long session.

It is possible to set 9 selections in each Left & Right channels. Once 9 buttons are selected in one channel, you must deselect one of them to add a new selection.

Theraphi sounds table

FREQ	BEAT	SHIFT	FREQ	BEAT	SHIFT
10000	10000	10000	10000	10000	10000
6150	6150	6150	6150	6150	6150
3800	3800	3800	3800	3800	3800
2300	2300	2300	2300	2300	2300
1500	1500	1500	1500	1500	1500
900	900	900	900	900	900
550	550	550	550	550	550
340	340	340	340	340	340
210	210	210	210	210	210
130	130	130	130	130	130
80	80	80	80	80	80
49	49	49	49	49	49

Left & Right parts of the table are related to Left/Right ears.

Best results are acheived when BEAT & SHIFT are both selected.

If you want to change the presets, make sure to alternate BEAT & SHIFT from left & right channels for each selected frequencies (like in this example).

It is possible to set 9 selections in each Left & Right channels. Once 9 buttons are selected in one channel, you must deselect one of them to add a new selection.

Relationship between Theraphi sound frequencies & the body

Theraphi sounds

can also be used to enter in resonance with specific parts of the body.

You can use the 7 last THERAPHI presets
or

edit the sound table to select frequencies in relationship with specific parts of the body.

Frequencies related to different parts of the body

If you want to enter in resonance with specific parts of the body, you can select frequencies related to the part(s) you want the sounds to work on (see the corresponding table in the next slide).

Even if you decide to work on high frequencies parts, please select also at least 2 lower frequencies, like 130 & 210 (as it is possible to set 9 selections in each Left & Right channels). See example below.

FREQ	BEAT	SHIFT	FREQ	BEAT	SHIFT
10000	10000	10000	10000	10000	10000
6150	6150	6150	6150	6150	6150

Chakras and Nadis

The nadis are well known by yoga practitioners.

One of their challenge is to move energy through the nadis to feed their physical, mental, and spiritual development.

The nadis are our energetic irrigation system.

The Sanskrit word nadi means “flow,” “motion,” or “vibration.”

The fundamental nature of a nadi is to flow, to find inside the body the path of least resistance and nourish everything in its path.

This is the most common way to display Ida & Pingala nadis.

Chakras and Music notes

Altho scientifically controversial - if we study carefully - it does appear there is significant agreement in the literature (references below) about an actual correlation between musical key signatures and the glandular areas or chakras which are energized by specific notes.

Chakras sounds Waves

1 CHAKRA

will enter in resonance with
a single chakra.
See on the picture.

+ CHAKRAS

will enter in resonance with
more than one chakra.
See on the picture.

Chakras sounds

are THERAPHI like sound waves
generated in relationship (resonance)
to the chakras frequencies.

See on the picture the parts of the
body related to the generated
frequencies.

For chakras sounds, it is only possible
to change the binaural beat frequency.
